

PICKUP CABIN DC200R

The Dutch Campers DC200R pickup cabin is our smallest available for normal sized pickup cars, the smallest does not directly mean less comfort.

The DC200R has at least the same comfort as the DC220 but fewer options are available due to its size.

Pickup unit DC200R is often chosen by people who want a basic cabin that is lightweight and very all-terrain suited.

Also, with this small model you can make your camper dreams alive by choosing your own interior decoration, options and colors.

The DC200R is fully built out of durable lightweight polyester sandwich panels, and also this demountable is built completely almost without any use of wood in the shell. This makes Dutch Campers demountable's unique in the market and your cabin extremely durable with an increased lifespan.
